

Semester week	Date	Name	Talk Title
1	19.10.2017	Marc Grund	Apatite fission---track thermochronology across the Shkoder---Peja Normal Fault in northeastern Albania and Kosovo with outlook on further PhD project.
2	26.10.2017	Jennifer Dreiling	Crustal radial anisotropy and linkage to geodynamical processes ----- a study based on seismic ambient noise in southern Madagascar
3	02.11.2017	Cecile Blanchet	Environmental changes in Northern Africa: interplay between the orbital forcing, precipitation, erosion and the humans
4	09.11.2017		no seminar --- SPP meeting
5	16.11.2017	Xiaoping Yuan and Jean Braun	<i>(Prelim)</i> : The COLORS project --- Integrating marine transport and sedimentation in landscape evolution models
6	23.11.2017	Angela Gomez Garcia	3D Lithospheric structure and physical state of the Caribbean plate: new insights from gravity and thermal modeling
7	30.11.2017	Alexandra Pohl	Thermometrische Untersuchungen an Metasedimenten und geologisches Profil am Rande des Byala---Reka---Doms bei Dolno Lukovo (Ostrhodopen, Bulgarien)
8	07.12.2017	Mark Handy	<i>(Prelim)</i> : Update --- Sabbatical in Zurich
9	14.12.2017	Claudia Heismann	Normal faulting at the basal part of the Molasse foreland basin, Austria --- Structural analysis of Tertiary normal faulting.
10	21.12.2017	Michael Strasser	The sedimentary archive as natural seismograph: Limitation and Perspectives from Subaquatic Lake--- and Deep---Sea---Trench Paleoseismology
11	11.01.2018	Neil Mancktelow	tba
12	18.01.2018	Julian Hülcher	Towards the inversion of tectonic signals from deep---marine archives: Competing tectonic signal propagation from across the Alps into the marine sink
13	25.01.2018	tba	tba
14	01.02.2018		no seminar --- SPP meeting
15	08.02.2018	Dirk Scherler	ERC---funded project: "Climate sensitivity of glacial landscape dynamics (COLD)".
