

## Inputdata

The following standard input data set (including climatological data for January) was provided:

- latitude-height cross sections of
  - temperature
  - ozone
  - specific humidity
  - methane
  
- latitudinal distributions of
  - clear sky albedo
  - solar zenith angle
  - surface and mean sea level pressures
  
- constants
  - concentrations of greenhouse gases (from IPCC, 1995)
  - solar constant, thermal emissivity and longwave albedo
