

Seminar Tectonics & Sedimentary Systems – Sommer Semester 2019		
Date	Name	Talk Title
18.04	Sarah Mosser (FU Berlin)	Cyclic changes in sediment accumulation rates offshore Sumatra <i>Colloquium: Prof. Dr. Gert Jan Weltje (Kristina Hippe)</i>
25.04	Johannes Rembe (Uni Potsdam)	Rutile data as complement to zircon U/Pb analysis in detrital studies
02.05	Guillaume Dupont-Nivet (Uni Potsdam)	Asian Paleogene Geodynamic and Climate interactions
09.05	Jan Pleuger (FU Berlin)	Trying to establish peak-pressure and peak-temperature gradients in the Adula nappe by equilibrium-independent geobarometric and geothermometric methods in order to assess the potential role of tectonic deviations from lithostatic pressure <i>Colloquium: Dr. Alexander Rohrmann (Kristina Hippe)</i>
16.05	Peter van der Beek (Grenoble University, France)	Exhumation history of the Namche Barwa Syntaxis (Eastern Himalaya) and implications for models of tectonic – surface process coupling
23.05	Philippe Yamato (Rennes University, France)	Brittle/ductile deformation of eclogites: insights from numerical models <i>Colloquium: Prof. Dr. Philippe Yamato (Eline Le Breton)</i>
30.05	No seminar	Public Holiday
06.06	Xiaoxia Huang (Uni Potsdam)	Paleobathymetric and sedimentary responses of the Weddell Sea basin to ocean circulation changes in global and regional scales
13.06	Núria Casacuberta Arola (ETH Zurich)	Study on the release of artificial radionuclides after the Fukushima nuclear incident <i>Colloquium: Dr. Núria Casacuberta Arola (Kristina Hippe)</i>
20.06	Mark Handy (FU Berlin)	The wilds of New Zealand <i>Colloquium: Prof. Dr. Eduardo Garzanti (Lorenzo Gemignani)</i>
27.06	Robert Neumeister (Fu Berlin)	Reconstruction of potential sediment routes in West Sumatra, Indonesia, using X-Ray Fluorescence
04.07	Chiara Montomoli (Pisa University)	Architecture and kinematics of the South Tibetan Detachment System and its role in the Himalayan belt <i>Colloquium: Prof. Dr. Rodolfo Carosi (Lorenzo Gemignani)</i>
11.07	No seminar	Exam week
