

## Webinar Tectonics & Sedimentary Systems – Sommer Semester 2020 – Thursdays at 13:15

Date	Name	Talk Title
23.04	<b>Ángela Maria Gómez Garcia</b>	Lithospheric structure of the South Caribbean margin using 3D lithospheric-scale gravity and thermal models.
30.04	<b>Pascal Olschewski</b>	Provenance of two sedimentary units of the Vendian to Lower Cambrian Sayano-Tuvan forearc basin in Tuva, Russia
<i>07.05</i>	<i>No seminar</i>	<i>EGU2020 virtual meeting</i>
14.05	<b>Philipp Kempf</b>	Paleotsunami record of south-central Chile in a complex coastal lake system
<i>21.05</i>	<i>No seminar</i>	<i>Public Holiday</i>
28.05	<b>Ehsan Kosari</b> (GFZ Potsdam)	On the relationship between offshore geodetic coverage and slip model uncertainty: Analog megathrust earthquake case studies
04.06	<b>Carlos Peña</b> (GFZ Potsdam)	Impact of Power-Law Rheology on the Viscoelastic Relaxation Pattern and Afterslip Distribution Following the 2010 Mw 8.8 Maule Earthquake
11.06	<b>Marisa Germer</b>	Peak Pressure Determination for Metapelites from the Adula nappe
18.06	<b>Philip Groß</b>	Evolving temperature field in a fossil subduction channel during the transition from subduction to collision (Tauern Window, Eastern Alps)
25.06	<b>Ümit Erbil</b> (Istanbul TU)	Late Oligocene shortening in the Thrace Basin, northern Aegean
02.07	<b>Sarah Mosser</b>	Sediment Generation and Transport from Source-to-Sink in Western Sumatra
09.07	<b>Benedict Mittelbach</b>	<b>Constraining the age and origin of a fluvial terrace sequence in the Tropoja basin, NE Albania</b>
<i>16.07</i>	<i>No seminar</i>	<i>Exam week</i>
