

Seminar Tectonics & Sedimentary Systems – Winter Semester 2018/19

Date	Name	Talk Title
25.10	Kristina Hippe	Cosmogenic ¹⁴ C- ¹⁰ Be data suggest abrupt soil erosion triggered by early agriculture on the Bolivian Altiplano (4-3 ka BP)
01.11	Armin Dielforder (GFZ Potsdam)	Formation of the Iberian-European Convergent Plate Boundary Fault and its effect on intraplate deformation in Central Europe
08.11	<i>No seminar</i>	<i>SPP Meeting Frankfurt</i>
15.11 16.11	Othmar Müntener (Lausanne University)	Petrological perspectives on the Alpine orogen: A discussion on some essential problems raised by standard subduction models
22.11	Boris Gailleton (Edinburgh University)	Tectonics from topography in heterogeneous landscapes: insights from the Romanian Carpathians
29.11	Philip Groß	Computer simulations of sheath-fold formation
06.12	Lorenzo Gemignani	Rivers sediments: archives of past and present tectonic, climatic and erosional processes
13.12	Ehsan Qorbani (Vienna University)	3-D shear-velocity model of the Eastern and Southern Alps from ambient noise tomography
20.12	Vincent Verwater	Surface kinematics of the Giudicarie Belt (Southern Alps)
10.01	Marc Grund	Cooling and exhumation at the Dinarides-Hellenides junction and their relation to the Shkoder-Peja Normal Fault
17.01	György Hetényi (Lausanne University)	<i>Seminar - Colloquium</i>
24.01	Julian Hülscher & Gero Fischer	Forcings and Dynamics in the Oligocene/Miocene Northern Alpine Foreland Basin
31.01	Nicolas Schley	<i>To be confirmed</i>
07.02	Christian Sue (Franche-Comté University)	<i>Seminar - Colloquium</i>
14.02	<i>No seminar</i>	<i>Exam week</i>
