

# International Master's Program “Planetary Sciences and Space Exploration” in Berlin starting October 2022

Continue reading if...

- you are a Bachelor student interested in space exploration and planets,
- you can imagine professionally working at space agencies or as a researcher exploring the solar system with satellites and space probes,
- it sounds attractive to you to continue your studies with an international Master's Program in Berlin

In October 2022 the “Planetary Sciences and Space Exploration” international Master's Program starts at Freie Universität Berlin. It is the only Master's Program of its kind in Germany. Berlin provides a unique, vibrant teaching and research environment, with professors and lecturers who are world-leading experts in the field of Planetary Sciences and Space Exploration.

All courses of the 4-semester program are in English (B2 language certificate required). Students from any country, with a Bachelor degree in any natural sciences or in engineering can apply. The only requirements are to have undertaken coursework totalling 8 CP in the area of physics and 10 CP in mathematics (including statistics).

**Application period from  
15 April until 31 May 2022**
