4) Databases of other libraries

Some of the libraries have their own access to databases. The offer might differ from that of the Freie Universität. The Staatsbibliothek zu Berlin offers a remote access to their databases, especially *Geobase*, *GeoRef*, *RSWB Plus*, *Social Sciences and Humanities (UDB-EDU)* and *American Bibliography of Slavic and East European Studies*.

Online access to journals and databases from your home or the abroad is possible for FU-students with a ZEDAT account via a proxy server of the FU. For details and also for access via the Wireless LAN on the campus please see:
