

## CURRICULUM VITAE

**Alexander T. Bazilevskiy** (in publications use spelling **Basilevsky**)

Born: 4 October, 1937 in Voronezh, Russia

### ***Education and Scientific Degrees:***

1959, Master of Science in Geology, Voronezh State University, Voronezh.

1968, Doctor of Philosophy in Geochemistry, Vernadsky Institute of Geochemistry and Analytical Chemistry, USSR Academy of Sciences, Moscow.

1986, Doctor of Sciences in Geochemistry and Planetary Science, Vernadsky Institute of Geochemistry and Analytical Chemistry, USSR Academy of Sciences, Moscow.

2007, Professor in Geochemistry, Vernadsky Institute of Geochemistry and Analytical Chemistry, Russian Academy of Sciences, Moscow.

### ***Professional Career***

1954-1959, Student of Geological Department of Voronezh State University, Voronezh;

1959-1963, Junior Geologist, Geologist, Senior Geologist of the Geologic Mapping Expedition, Geologic Office of Central Regions, USSR Ministry of Geology and Protection of Earth Interiors, Moscow; 1:200,000 Geologic mapping in Moscow, Tambov, Vladimir and Voronezh provinces;

1963-1966, PhD Student of Geological Department of Moscow State University, Moscow; Experimental petrology of mafic and ultramafic rocks;

1966-1968, Senior Geologist of the Geologic Mapping Expedition, Geologic Office of Central Regions, USSR Ministry of Geology and Protection of Earth Interiors, Moscow; Geochemical Prospecting for Ore Deposits in Belgorod, Kursk, Lipetsk and Voronezh provinces of Central Russia;

1968-1975, Junior Scientist, Senior Scientist of Institute for Space Research, USSR Academy of Sciences, Moscow; Photogeologic studies of lunar surface;

1975-Present, Senior Scientist, Chief of Laboratory of Comparative Planetology (1982-2016), Chief Scientist (Since 2016) of Vernadsky Institute of Geochemistry and Analytical Chemistry, USSR/Russian Academy of Sciences, Moscow; Photogeologic analysis of the Moon, Venus, Mars, Phobos, Callisto, Ganymede and Triton; Studies of geology and geochemistry of terrestrial impact craters; Geological/geochemical consideration of chemical analyses of surface materials of Venus and Mars; Photogeologic mapping of Venus and Mars.

### ***Involvement in Space Missions:***

1968-1969, Selection of landing sites for Soviet manned expedition to the Moon (later cancelled) and study of sites' characteristics important for landing (areal densities

of craters and rock fragmentss, distribution of slopes).

1970-1976, Luna 16, 20, 24, Selection of landing sites and study of sites' characteristics important for landing, Photogeologic analysis of the sites in the regional context;

1971-1973, Lunokhod 1, 2, Selection of landing sites and study of sites characteristics important for landing; Photogeologic analysis of TV panoramas and operational planning of the current studies; Joint consideration of the results of photogeologic analysis, soil mechanics studies, and X-ray fluorescence bulk chemistry analyses;

1975-1986, Venera 9, 10, 13, 14, Vega 1, 2, Selection of landing sites; Photogeologic analysis of TV panoramas; Joint consideration of the results of photogeologic analysis, soil mechanics studies, as well as gamma-ray and X-ray fluorescence chemical analyses;

1983-1984, Venera 15, 16, Photogeologic analysis and geologic mapping of Venus surface;

1989, Voyager/Neptune encounter, Soviet guest investigator in NASA Voyager space mission, Photogeologic analysis of Triton, first finding of strike-slip faults on this body;

1990-1993, Magellan, Soviet/Russian guest investigator in NASA Magellan space mission, Photogeologic analysis and mapping of Venus surface with special attention to the Venera-Vega landing sites.

2002, Mars Odyssey, Geologic-geochemical interpretations of data acquired by Russian High Energy Neutron Spectrometer with special attention to searches of signatures of chemically bounded water on Mars.

2003-present, Mars Express (launched in 2003), Participating scientist in High Resolution Stereo Camera Experiment.

2005- 2011, Fobos Grunt (Russian sample return from Phobos, satellite of Mars, to be launched in 2009), Selection and characterization of landing sites, member of Advisory Committee.

2009-present, Luna Glob / Resource missions (Russian missions to the Moon, to be launched in 2021-2025), Selection and characterization of landing sites, preparation of the in-situ study program.

### ***Temporary positions and activities:***

1992-1993, then during 1994-2015, each year for three months – Senior Research Associate, then Visiting Professor, Department of Geological Sciences, Brown University, Providence, R.I., USA. Photogeologic analysis of the Magellan images of Venus: The model of regional/global stratigraphy and the geologic history of Venus worked out and published in several papers in Journal Geophysical Research Planets, Geophysical Research Letter, Planetary and Space Science, Geology.

1994, participation in field tests of the JPL US and IKI Russia models of Mars rovers in Mohave desert, California, USA.

1998, 2002, 2006-2008, Guest scientist at the Department of Astronomy, Oulu University, Oulu, Finland, Photogeologic study of Magellan images of Venus (corona-like features) and MOC images of Mars (joint analysis with Mars Odyssey neutron

spectrometry data).

1999-2015 for one to three months each of these years, Guest scientist (Humboldt Foundation awardee), Max-Planck Institute of Solar System Research, Katlenburg-Lindau, since 2014 in Gottingen, Germany. Photogeologic analysis of Mars Pathfinder TV panoramas, Study of local geology and soil characteristics for the Mars Polar Lander site, Selection of targets for IR spectrometer to be flown on-board of ESA mission SMART 1, Joint study of images of Mars material analogs taken by Beagle-2 TV microscope, Geologic analysis of Near-Infra-Red images of Venus surface taken by VMC camera, Venus Express.

2004-2013 for one to two months each year, Guest scientist, Free University of Berlin, Germany. Photogeologic analysis and mapping of images of Mars surface taken by the High Resolution Stereo Camera onboard of Mars Express. Review of the results of K-Ar dating of impact melts of lunar highlands.

#### ***Field expeditions:***

1957, Central Kazakhstan, Studies of mineralogy of molybdenum bearing greisens of Northern and Eastern Kounrad ore deposits, 3 months.

1958, Central and Southern Kazakhstan, Studies of petrology of alaskite and biotite granites, 3 months.

1959-1963, Central Russia, 1:200,000 geologic mapping in Moscow, Tambov, Vladimir and Voronezh provinces, four months each year.

1963, Northern Kazakhstan, geochemical studies of Paleozoic metamorphic complexes, two months.

1965, Northern, Central, and Southern Urals, Studies of ultramafic rocks and associated chromite ores, one months.

1978, 1980, Impact crater Janisjarvi, Central Karelia, petrological and geochemical studies of impactites, for one month each of these two years.

1981, Kamchatka, Studies of morphology of volcanic landforms in the vicinity of Tolbachic basaltic volcano, six weeks.

1982, Kamchatka, Studies of morphology of volcanic landforms in the vicinity of Shiveluch andesite volcano, six weeks.

1983, India, Decan plateau, Impact crater Lonar, Petrological and geochemical studies of impactites, one month.

#### ***Membership in Editorial Boards of Scientific Journals***

1989-present, Member of Editorial Board, *Geokhimia (Geochemistry International)* is English language edition).

1991- present, Member of Editorial Board, *Astronomicheskii Vestnik (Solar System Research)* is English edition).

1991-1997, Associate Editor, *Icarus*.

1995-present, Member of Board of Advisory Editors, *Planetary and Space Science*.

***Organization of scientific conferences:***

1985-2015, Vernadsky-Brown Microsymposia on Comparative Planetology, 55 microsymposia were organized for the last 27 years, odd in the US, even in the Soviet Union/Russia. 1985-1991, Deputy of Soviet Co-Chairman, 1992-2009, Russian Co-Chairman of the Organizing Committee.

1996-1999, Co-Chairman of Session “Geology and Geophysics of the Terrestrial Planets” of Section PS – “Planetary Science” of the General Assemblies of the European Geophysical Society.

2010-2018, Moscow Solar System Symposia, Member of Program Committee.

***Awards:***

1989, USSR State Award for the geologic analysis of the results of the Venera 15/16 radar survey.

1999, Humboldt Research Award, Federal Republic of Germany, in recognition of the research results in planetary studies.

2000, Runcorn-Florensky Medal of the European Geophysical Society, for pioneering work in planetary sciences and fundamental contributions to comparative planetology.

2001, Barringer Medal of the Meteoritical Society, for the outstanding results in studying meteoritic craters of Earth and other planets.

2004, Masursky Award of the Division of Planetary Science of the American Astronomical Society, in recognition of outstanding service to planetary science and exploration.

***Named after:*** Asteroid 3991 Basilevsky, disc. 26 Sept. 1987 by E. Bowell.

***Languages:***

Russian (mother language), English (fluent).

***Teaching experience***

1992-2002, assisted Professor J. Head in teaching seminars on different topics in Planetary Geology (MS-PhD level), Geological Department, Brown University, Providence, R.I., USA.

1996-2006, Courses of lectures (24 hours) on Basics of Comparative Planetology, Geological Department, Moscow State University.

May 1997, Short Course in Planetary Geology (15 hours), Universita d'Annunzio, Pescara, Italy.

December 1998, Course on Venus Geology and Geophysics (32 hours), Oulu University, Oulu, Finland.

December 2000, Course on Geology and Geophysics of Mars (20 hours), Oulu University, Oulu, Finland.

May 2002, Short Course in Planetary Geology (15 hours), EU Summer School on Planetary Geology, Universita d'Annunzio, Pescara, Italy.

December 2007, Short Course in Planetary Geology (22 hours), China University of Geosciences, Wuhan, China.

October-November 2008, Short Course in Planetary Geology (12 hours), Institute for Space Research, Russian Academy of Sciences, Moscow, Russia.

October-November 2011, Short Course in Planetary Geology (12 hours), University of Geodesy and Cartography, Moscow, Russia.

February-March 2016, 2017, 2018, Short Course in Planetary Geology (14 hours), Macau University of Science and Technololy, Macau, China.
