

Geowissenschaftliches Kolloquium

Geological, Mineralogical and Geochemical Aspects for Critical and Rare Metals in Greece

Mittwoch, 10. Juli - 16.15 Uhr

Theodoros Markopoulos
Technical University of Crete

The European Union is highly dependent on critical and rare metals which are very important for a sustainable development. However, European industry is not able to cover its demands from native sources and it imports commodities from third countries.

Greece is one of the EU countries with the most potential for supplying these strategic metallic raw materials in the future, since it hosts a large number of ore deposits.

Theodoros Markopoulos academic career he has been teaching modules, at both graduate and postgraduate level, in the fields of Mineralogy, Petrology, Economic Geology, Geothermal Energy, Geomaterials and the Environment, and Building and Restoration Materials of Monuments at the Universities of Goettingen (Germany), Athens (Greece), Crete (Greece), San Juan (Argentina), Queensland (Brisbane), Sydney (Australia), Nuclear and Geosciences Center,

Taupo, New Zealand, Seville (Spain) and FU-Berlin (Germany). Furthermore he has been supervising numerous postgraduate students at both MSc and PhD level.
