

Geowissenschaftliches Kolloquium

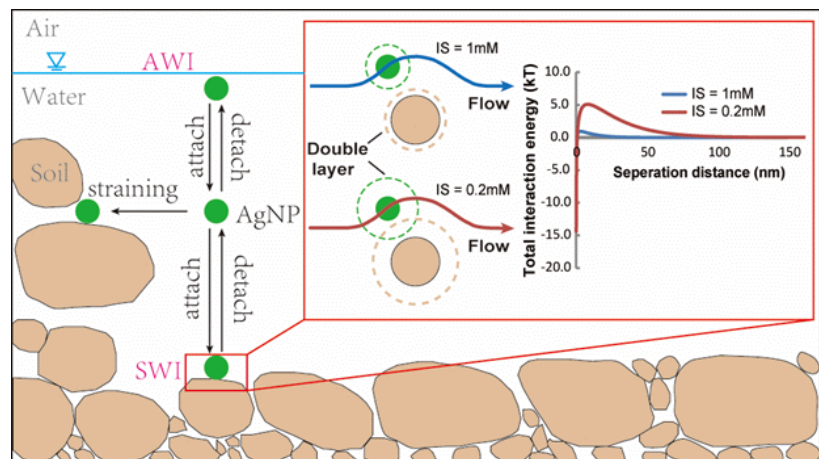

Integrated approaches to investigate reactive transport processes in soil and groundwater

Donnerstag, 25. Januar 2018 - 16.15 Uhr

Irina Engelhardt

Technische Universität Berlin

The presentation gives an overview about experimental and numerical approaches to analyze reactive transport processes in soils and groundwater. Different examples of lab experiments, lysimeter experiments and field experiments are given with respect to investigate the transport of pharmaceuticals, colloids and bacteria in variable saturated porous media.

Curriculum vitae (selection):

Since 2017	Professor of Hydrogeology, Technical University, Berlin
2015 - 2016	Professorship in Hydrogeology and Hydrochemistry, Technical University, Freiberg
2014	Habilitation in Hydrogeology, Technical University, Darmstadt
2012 - 2015	Tenure-track scientist, Research Center Jülich
2007 - 2012	Research assistant, Technical University, Darmstadt
2004	PhD, Eberhard Karls University, Tübingen

Institut für Geologische Wissenschaften

Großer Hörsaal (C.011), Haus C
Malteserstrasse 74-100
12249 Berlin
